### **How to Make a Combination**

To make a combination bottle put 2 drops of each stock level Bach Remedy required ( 4 drops of Revival Remedy ) into a clean glass dropper bottle containing up to 30ml of spring water. You can add a teaspoon full of brandy or cider vinegar as a preservative if you wish. To make a combination in a drink put 4 drops of each remedy required ( 8 drops of Revival Remedy ) into a glass of water.

### **Dosage Instructions**

We recommend a dosage of 4 drops on the tongue 8 x a day for chronic states and every 30 - 60 minutes for acute states, reverting to the normal dosage when more balance has returned. Take your chosen Bach Flower Remedies for two - four weeks before reviewing how you feel. After this time you may find that you need to change some of your original choices or that you need to continue with the same ones for longer. Working in this way over a period of six months or so you will find that there has been a subtle but definite shift in the way you perceive your world.
